

RAZAFIMAHEFA Johanne Fanantenana Michaël

Full-Stack Software Engineer — React / Next.js / React Native / Node.js (TypeScript)

Madagascar | +261 38 21 886 69 | johanne.razafimahefa@gmail.com | linkedin.com/in/michael-razafimahefa

PROFILE

Full-stack engineer building web and mobile products end-to-end in TypeScript: React and Next.js on the web, React Native on mobile, and Node.js (Express, NestJS) on the API side. I take features from concept to production — designing secure REST and GraphQL APIs, turning UI/UX designs into responsive interfaces, and integrating SQL and NoSQL databases. Hands-on across SaaS, payments and AI-assisted products, including real-time notifications and Linux/VPS deployments. Used to fully remote, distributed teams and Git-based workflows (branching, pull requests, code reviews). Autonomous and ownership-driven, I ramp up quickly on new technologies.

PROFESSIONAL EXPERIENCE

Full-Stack JavaScript Developer — *Freelance*

Jan. 2024 – Present

- Designed and developed full-stack SaaS applications (payments, marketplace) end-to-end with React.js, Node.js, and TypeScript
- Built responsive, ergonomic user interfaces with React, Next.js and Tailwind CSS, optimized for performance and usability across browsers and devices
- Developed secure, high-performance REST and GraphQL APIs with Node.js, Express, and Prisma
- Integrated online payment systems (Stripe, Google Pay, Apple Pay)
- Worked directly with clients on requirements, estimation and technical trade-offs, owning features through to production
- Deployed and administered Linux servers (VPS): production releases, maintenance, and incident resolution

Stack: Node.js, Express, React.js, TypeScript, GraphQL, Prisma, Tailwind CSS, Stripe, Next.js

Full-Stack JS / Symfony Developer — *Devphantom*

Mar. 2025 – Mar. 2026

- Developed new features and maintained a web application (Next.js / Symfony) within a distributed, ticket-based team
- Turned UI/UX designs and wireframes into responsive, production-ready interfaces, working closely with designers
- Integrated internal and external REST APIs on Symfony and NestJS back ends; contributed to code reviews and pull requests

Stack: Next.js, TypeScript, oRPC, Symfony, Tailwind CSS, shadcn/ui, Stripe, DocuSeal

React & .NET Developer — *Ravinala Airports*

June 2024 – Mar. 2025

- Built a complete project management application (phases, resources, budgets)
- Implemented a user management system with roles and permissions
- Created interactive dashboards with custom filtering and sorting
- Implemented real-time notifications and automated deadline reminders
- Collaborated with the internal team to adapt the application to business processes

Stack: React.js, TypeScript, C#.NET, SQL Server, Tailwind CSS

Mobile Developer (React Native) — *CELTO (fixed-term contract)*

Dec. 2023 – Jan. 2024

- Developed a cross-platform mobile application with React Native to track a cheese production chain (milk collection → distribution)
- Managed delivered milk volumes per milker, with payment and transaction tracking
- Built a web back office for data administration

Stack: React Native, QR codes (scan/generation), React.js, Tailwind CSS, SQLite, Prisma

WordPress Plugin Developer — *Materauto (Internship)*

Oct. 2022 – Jan. 2023

- Designed and developed a WordPress plugin embedding an intelligent chatbot
- Implemented an AI able to answer user questions and route them to the right contact
- Automated information requests and vehicle rental pre-orders

Stack: Python, TensorFlow, Keras, JavaScript, PHP

TECHNICAL SKILLS

Languages: JavaScript (ES6+, async programming), TypeScript, C#, PHP
Front-end: React.js, Next.js, modern CSS & responsive design, Tailwind CSS, shadcn/ui
Back-end: Node.js, Express, NestJS, PHP (Symfony, Laravel), REST APIs, GraphQL, oRPC, C# .NET
Mobile: React Native (cross-platform apps, device APIs: camera / QR scanning)
Databases: PostgreSQL, MySQL, MongoDB, SQLite, SQL Server
APIs & integrations: REST, GraphQL (schema design, client-side integration), third-party services (Stripe, Google Pay, Apple Pay)
DevOps / Tools: Git (branching, merging, pull requests), Linux server administration (VPS), deployments, code reviews, Agile (Scrum, Kanban)

EDUCATION

Master’s Degree in Computer Science (Professional) École Nationale d’Informatique (ENI), Fianarantsoa — With honors	2024
Bachelor’s Degree in Computer Science (Professional) École Nationale d’Informatique (ENI), Fianarantsoa — With honors	2023
High School Diploma — Science Track (Série C) Lycée Andrianampoinimerina, Sabotsy Namehana	2018

LANGUAGES

English: Professional working proficiency **French:** Fluent **Malagasy:** Native
